Multi-Step Planning

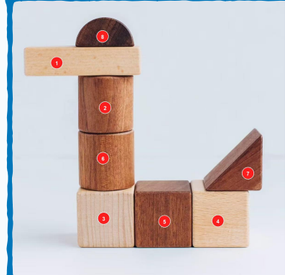

Route Planning

Plan the shortest route from the current location to the target using the floor plan and related information.

Capacity Planning

Plan storage actions based on object capacity and state information.

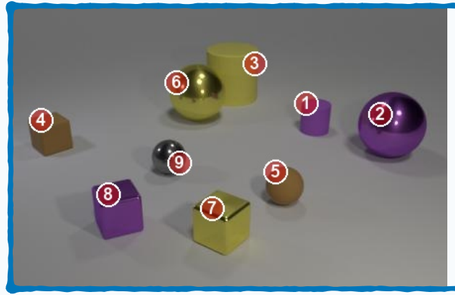

Dependency Planning

Plan the correct retrieval order based on support dependencies between objects.

Rearrangement Planning

Plan the correct rearrangement of objects in a disorganized room based on the organized target state.

Constraint Sequencing

Plan the object retrieval order according to category constraints such as color and shape.
